Description of Services

Provide a flexible Scheme, offering short term respite care and outreach support for adults with disabilities who live within the Scheme's catchment area.

The Scheme arranges respite accommodation for adults with disabilities in other people's homes. We are also able to provide support during the daytime or evening within the Adult Placement Carer's home or in the local community for social activities or support with learning daily living skills.

These people have been approved as Adult Placement Scheme Carers by an independent panel. They are paid by the Cambridgeshire Learning Disability Partnership for the service they provide. Carers agree to welcome Service Users into their own homes and offer them the care and support they need during the length of their stay.

The scheme ensures that the specific needs of individuals are taken into account and matched with Carers approved by the Scheme who are best able to meet these needs.
