### **Description of Services**

Predominantly, we provide tailor made housing support options for adults with learning disabilities in these local communities that take the form of:

**Supported living services** to help those looking to live in their own homes and achieve a level of independence not previously experienced.

**Short-term accommodation placements** to provide stability for those between long-term support solutions which provide stepping stone accommodation, personal assessment and skills development. Specialist services in Cambridgeshire and Southend on Sea are an excellent example of this.

In addition to these we also provide:

**Outreach services** to those looking to be more fulfilled and better integrated lives as part of their local communities

**Opportunities services** that give local residents access to a broad range of activities and community facilities year-round.
