Description of Services

Artistic and cultural engagement for people experiencing mental health problems or at particular risk of doing so.

We work with people of all ages in a wide range of settings with a varied offer of cultural and participatory arts activities. Please visit the website for more details on past and existing projects.

In development are two schemes:

- 'Arts on Prescription' service addressing needs of people suffering anxiety and depression with 12 weeks of participatory arts workshops in a range of artforms.
- A rural touring arts education studio which will ensure that high quality participatory opportunities reach out to some of the more isolated rural areas in our region.
